

Richard Keller

Full Stack Web Developer

1520 S 68th East Avenue, Tulsa, OK 74112 | 479-200-8533 | richard@richardkeller.net

PROFILE

Web developer with a passion for front and backend development. My expertise includes CSS/SCC, PHP, WordPress, jQuery/Javascript, and responsive design. Writing clean and maintainable code, while being thoughtful of accessibility, is always on my mind while I work. My goal is to work for a company that will challenge me and benefit from my skills.

EXPERIENCE

GURUSTU MARKETING LEAD DEVELOPER | NOV 2012 - PRESENT

- Wrote frontend and backend code for 25+ websites
- Built and maintained javascript and ruby applications
- API experience: Amazon, Github, Flickr, Facebook, and Twitter
- Collaborated with designers and management to meet tight deadlines
- Managed and maintained linux servers for web hosting
- Built custom WordPress plugins to meet clients needs

FREELANCE WEB DEVELOPER / DESIGNER | 2012 - PRESENT

Designed and coded WordPress websites.

PROJECTS

I have had the opportunity to work on some amazing projects with equally great people over the past 4 years. Here are some projects that I am proud of:

Blue Dome District | <http://bluedomedistrict.com/>

This site was really fun to make. Besides making a custom map of the district, the site has multi user editing capabilities in which each business can edit their own page.

Risk To Ready | <http://risktoready.org>

I built the backend with Ruby on Rails, and the frontend with javascript. The big challenge was to taking data from UCLA and making it meaningful.

Oklahoma Foodbank Website | <http://okfoodbank.org/get-help>

I created tool using the Google maps API to help people find food banks in their area.

EDUCATION

A.A.S | TULSA COMMUNITY COLLEGE | 2015

Focus: Ruby on Rails, Javascript, PHP, SQL, HTML. and CSS.
